

Ball & Plate system control

Topics Covered

Introduction

Mathematical modeling and obtaining
the state space model

Controllability and observability of the
system

Realization and stability of the system

State feedback

LQR

What is B&P
system?

Mathematical modeling

Electrical part

Mechanical part

*State space
representation*

Controllability

Observability

Realization

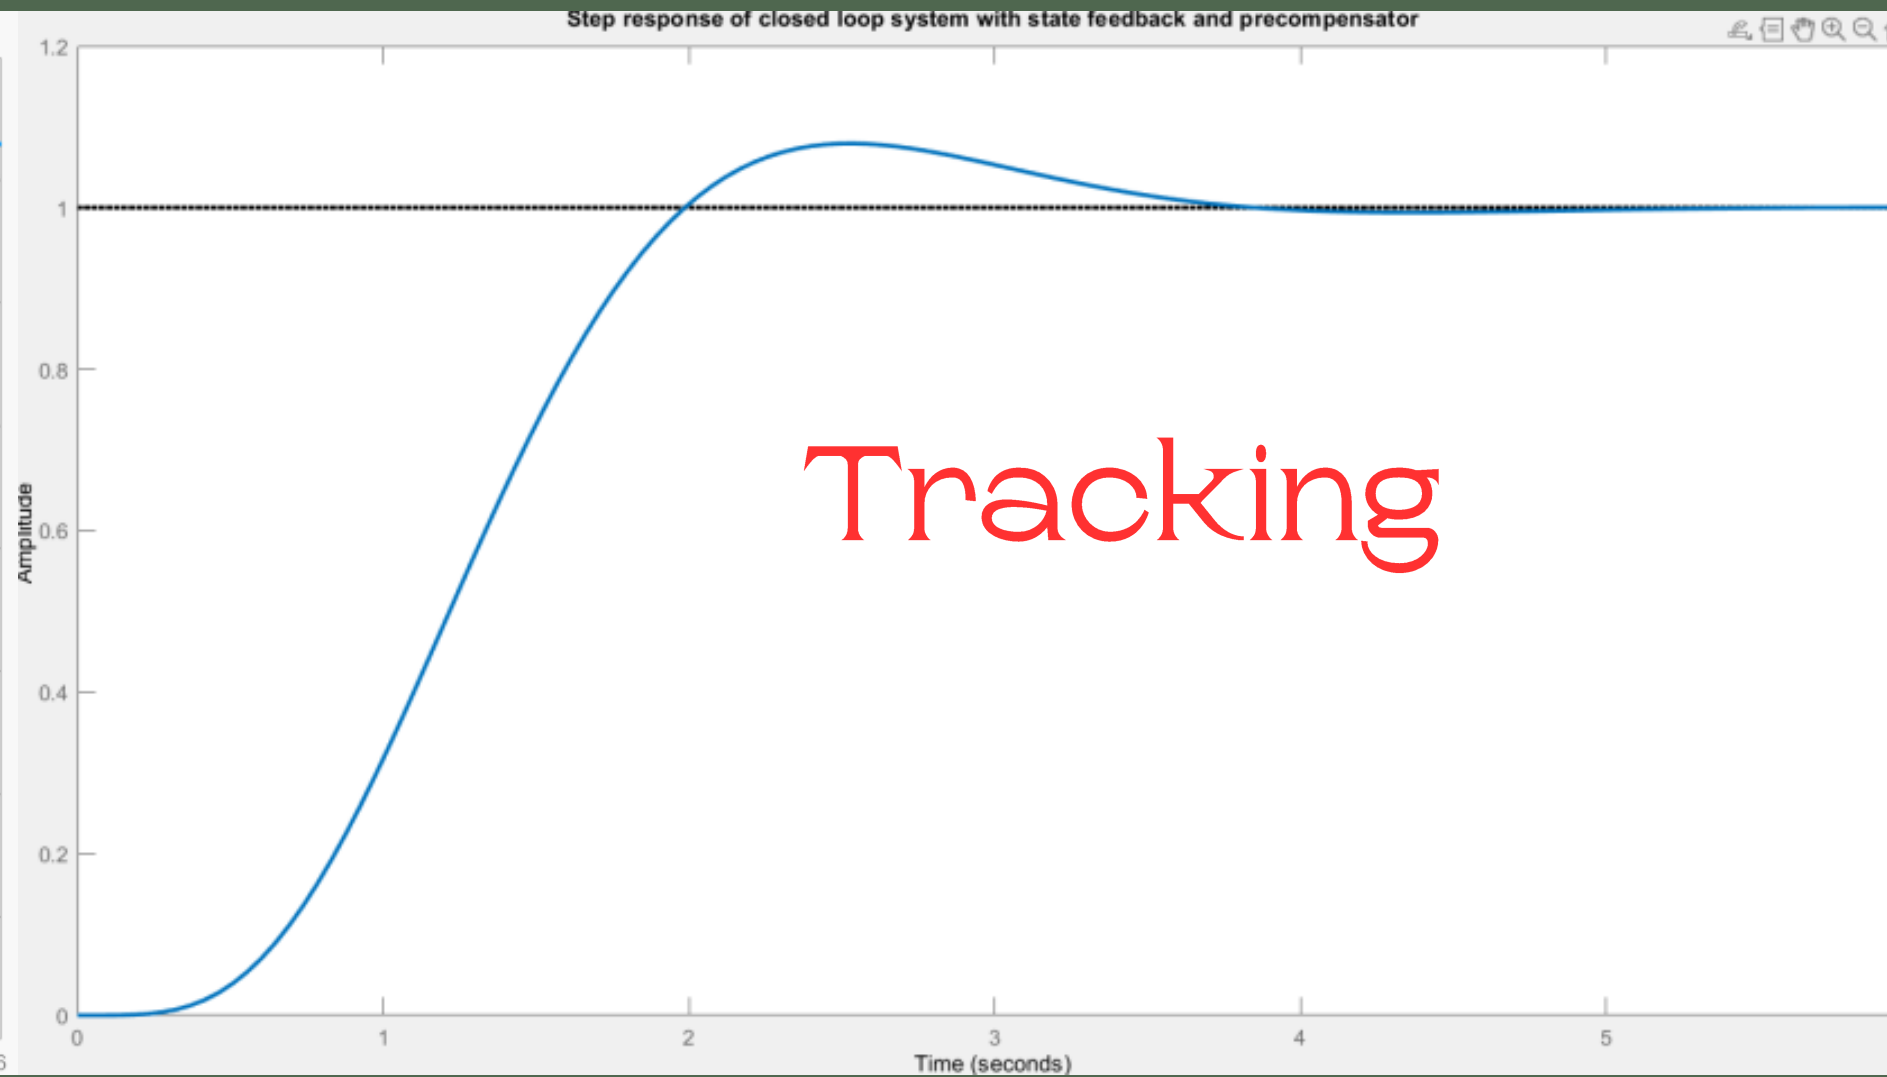

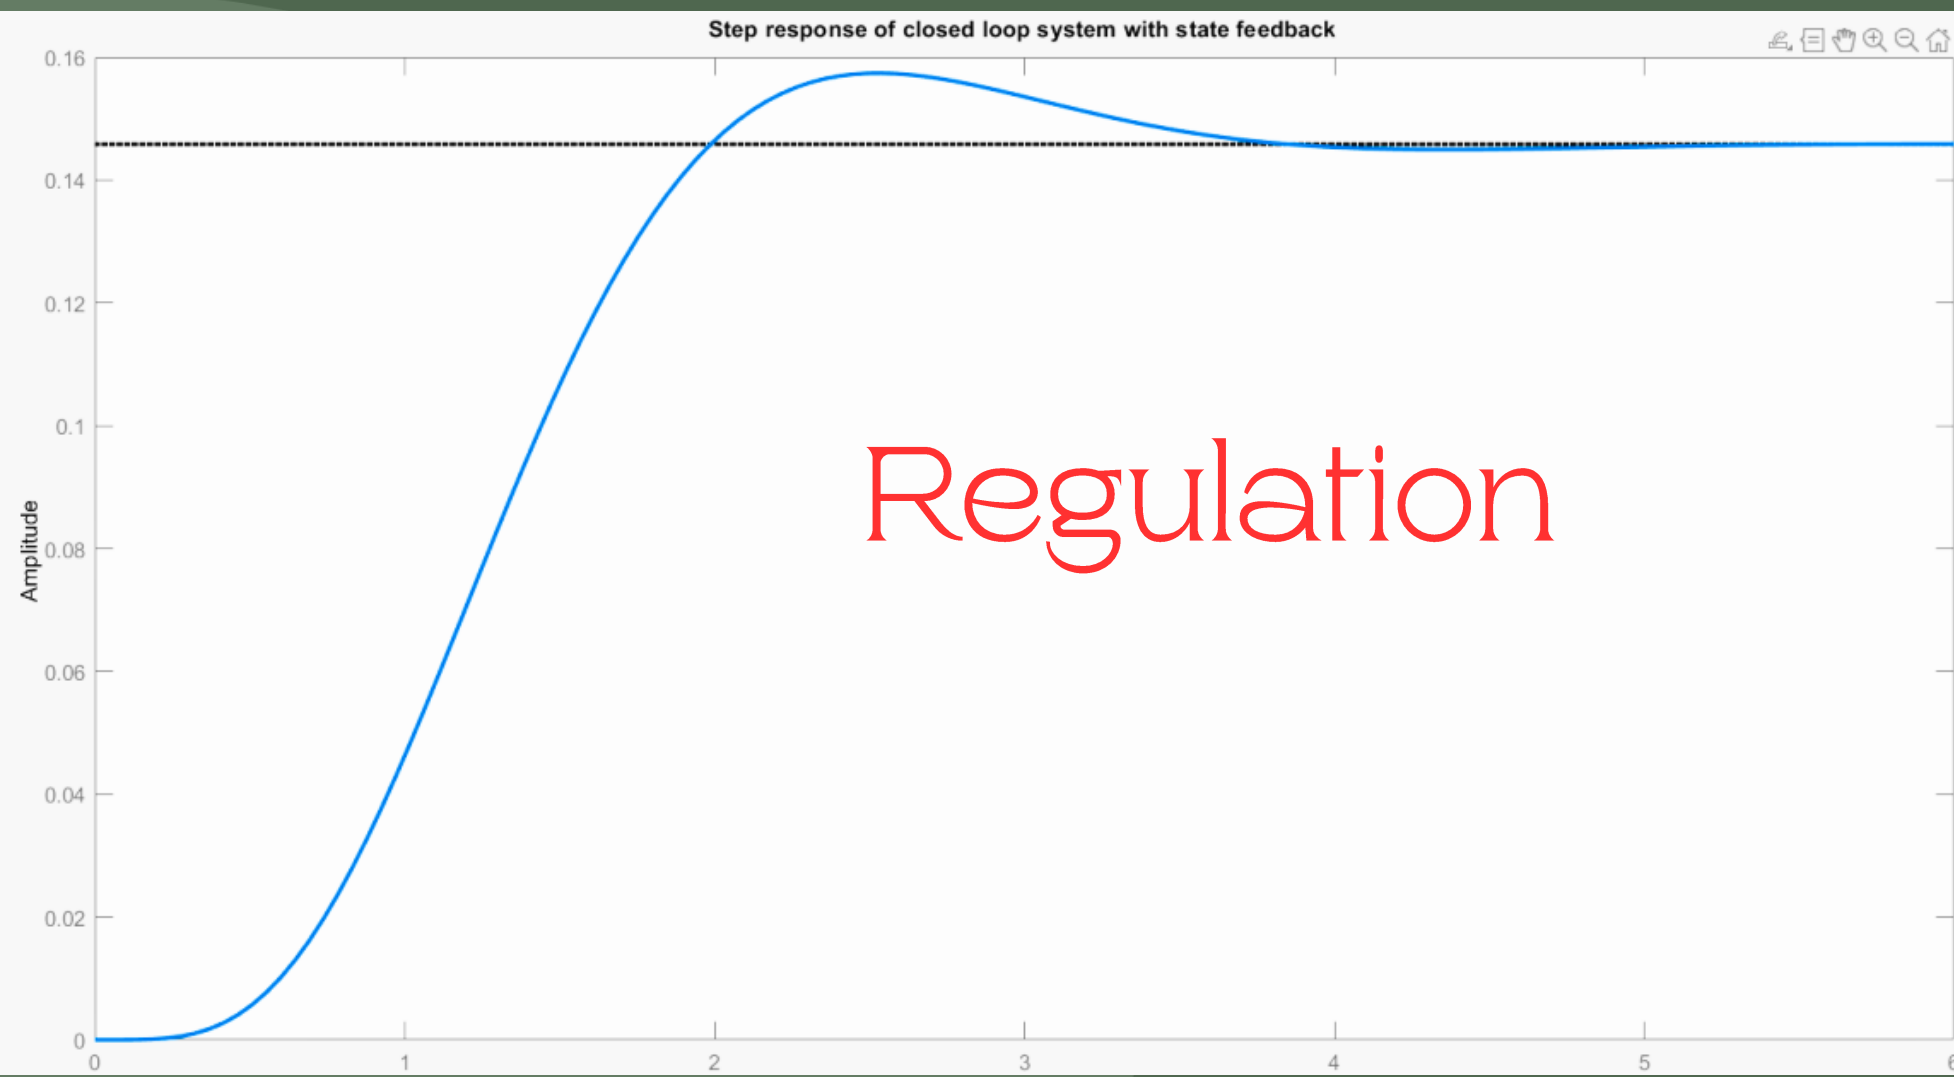

stability

BIBO

Lyapunov

State Feedback

Linear Quadratic Regulation

Thank you!
